TO WHOM IT MAY CONCERN

We have relied upon Structural Engineers, LLC for their professional services and engineering design for various projects, both residential and commercial . The scope of work has included new custom home construction, large residential renovations and the Grand Canyon Village Shops just recently completed. This last project combined wood, steel and masonry construction: SEC provided cohesive engineering design throughout the building process.

We find that Structural Engineers always responds promptly to our needs and traveled to the Grand Canyon for all inspections. They are personable, approachable and professional. We consider them part of our team as they demonstrate genuine interest in the success of our projects.

For these reasons, we recommend Structural Engineers LLC.

Yours truly,

Tom Jaworski
